I BARZAGHI

Design by

ildoppiosegno

Since 1965 the brother's Barzaghi have supported, as contractors, the most prestigious firms in the furniture industry; today appear as prominent figures in the world of design creating iBarzaghi brand and specializing in the production of solid wood furniture of the high-quality. The collection, made of walnut, designed by M. Ferrigno and C. Dameno, ildoppiosegno design studio. The technical details have been brought out, playing with a contemporary language the traditional furniture made in Brianza; the skeleton of chairs and tables have become the focal point and the true beauty of the whole collection, which is divided into five themes or "stories": Charles, Mies, Otto, Capitello and Giardino d'inverno.
